Jerry,

Yes, injection has stopped in these two wells and it is not CRC's intention to request an aquifer exemption for this area of the Kern River field.

Tony

Hi Tony,

I want to clarify your response in the previous email. Is it Vintage's plan to not request an AE for the unexempted portions of the Kern River formation in Kern River field?

From our records, these 2 wells are still injecting (as of Feb. 2015), although you indicated that injection has already stopped. They are part of KERN RIVER field, not Kern Front, although they are very close to the boundary.

Appreciate your feedback soon.

*Jerry Salera*

Jerry,

I have checked with the Kern Front group and they indicate that injection has stopped into the Kern River Formation in these wells. We do not plan on submitting a Kern River Formation aquifer exemption for Kern Front.

God morning Tony,

Please check active Vintage disposal wells "WD-1" (030-10794) and "WD-2" (030-10795). Per our records, these are part of Kern River field, wells injecting into the of sub-3000 TDS unexempted portion of the Kern River formation. These wells need an AE asap. Thanks.

Jerry

Jerry,  
I am providing guidance for all the CRC exemptions including Kern Front. I didn't think we had disposal in the Kern River Field.  
Tony

Tony,

Are you also going to work on the AE for the other Vintage wells in Kern River and Kern Front?
